**GRADUATE STUDIES OPPORTUNITIES**

For those who aim to pursue graduate degrees after their BSc (Maritime Studies) degrees, the College of Engineering is offering graduate programmes which lead to the award of the Master of Science in Maritime Studies, and Master of Science in Logistics. In addition, Nanyang Business School also offers business graduate programmes.

**OUR STUDENT**

The Maritime Studies (MS) programme in NTU is uniquely positioned as being the only dedicated maritime degree course that is offered by a local university. My experience in MS has been nothing short of amazing – the culture and community is strong, opportunities are aplenty and industry support, unparalleled. Most importantly, NTU’s MS prepares students for versatile career options both within and beyond the niche industry as there are options of a double business major or an international trading specialisation. Graduates are well-received by employers with more approached for management graduate schemes. Many undergraduates are offered scholarships by companies too.

With a small cohort of about 80 students, the culture of our course is homey, supportive and constructively competitive. Through the numerous activities organised by the Maritime Business Society (MBS) and CEE Club, industry exposure and personal development opportunities abound too. I managed to meet many organisational leaders as president of MBS and to co-organise/attend many events with strong support from the office and maritime community. MBS connects MS students to networking events, industry visits and talks, platforms that have honed many lifelong skills for me.

Initiatives like a CEE-subsidised international University Scholars Leaders Symposium and a fully-funded Global Internship Programme by MPA show the immense support from both the school and industry to MS students. Hence, if you are looking for a dynamic and enriching university experience, look no further than NTU’s Maritime Studies programme!

The programme focuses primarily on tertiary education in shipping, business, management, and maritime science and technology, so as to build up the expertise of the local shipping industry as well as to work towards establishing Singapore as a centre of excellence for shipping business, research and development.

The BSc degree in Maritime Studies and the BSc degree in Maritime Studies with Business Major are conducted jointly by the Nanyang Technological University and NTU Norwegian Business School, Norway. These programmes are supported by the Maritime and Port Authority of Singapore (MPA). NTU is one of the largest business schools in Norway and Europe. It has six campuses, with the main one located in Oslo. BI is the first Norwegian institution to receive the EQUIS (European Quality Improvement System) accreditation.

NTU has been at the forefront of teaching, research and consulting in the areas of shipping and related businesses. The programmes produce graduates who are well-versed with the maritime industry and strong in business knowledge. They will be the future leaders of the global maritime industry.

The programme provides students with well-rounded education in business, management, and maritime science and technology, to develop a comprehensive understanding of the global maritime industry.

Students who are taking the Specialisation in International Trading are required to read three additional courses:

- Commodities’ Geology and Metallurgy
- Specialisation in International Trading Programme
- Principles of Economics

Students who are taking the Specialisation in International Trading Programme are required to complete one semester in the third year of their studies at BI. The curriculum also includes Industrial Immersions where students will be attached to organisations in shipping and related industries.

Students who are taking the Specialisation in Capital Markets are required to complete one semester in the third year of their studies at BI. The curriculum includes Industrial Immersions where students will be attached to organisations in shipping and related industries.

The programme curriculum comprises courses in various disciplines, such as finance, trade, management, and technology. Students will be exposed to the latest trends and developments in the shipping and related industries.
