One Postdoctoral Research Fellow Position Available

Tentative starting time: SEP 1, 2017

One short-term postdoctoral research fellow position is available in School of Civil and Environmental Engineering (CEE), Nanyang Technological University (NTU), Singapore. The research fellow will be working on a 6-month research project (extendable to 1 full year) focusing on hydrological modelling, rainfall analysis and climate change impact assessment. The basic requirements include:

- The applicant should have a PhD degree (in environmental engineering or water resources engineering or related field) from a reputational university or institute.
- Research experience in using urban hydrological model (like SWMM, SWAT etc.), MATLAB, statistical analysis, or other related software will be given favorable consideration.
- The applicant shall have good English writing skills and also a good publication record.
- The applicant shall be self-motivated and have strong independent and cooperative working capability.
- The salary and benefit follow NTU OHR guideline and candidate’s qualification.
- If interested, please send a cover letter and a detailed CV to Assistant Professor Qin Xiaosheng (Email: xsqin@ntu.edu.sg).
